

# Ann & Robert H. Lurie Children's Hospital of Chicago

## Fetal Cardiology Services

### Outpatient Appointments and Schedule

Our pediatric cardiologists provide fetal echocardiograms and fetal cardiac consultations at several convenient locations.

Our aim is to assist obstetric providers with accurate prenatal cardiac diagnoses for high-risk pregnancies or concerning fetal cardiac findings, including structural heart disease and fetal arrhythmias.

#### Location and Times

Fetal cardiology is offered on the Silver Cross Hospital campus at the Lurie Children's Outpatient Center located at 1870 Silver Cross Boulevard, Pavilion B, Suite 100, New Lenox.

Additionally, we offer fetal cardiology at several other locations, including: Lurie Children's Outpatient Centers in Arlington Heights, Huntley and Lake Forest, as well as Prentice Women's Hospital at Northwestern Medicine in Chicago and Northwestern Medicine Central DuPage Hospital in Winfield.

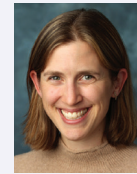

#### Appointments

Due to the complexity of fetal echocardiography, the expected duration of the procedure may be up to an hour. All echocardiograms are either performed, or personally supervised, by Bethan A. Lemley, MD, or Sheena A. Mansukhani, DO. Our fetal cardiologists interpret the fetal echocardiograms and provide results to the patients on the same day. The patient and family will be fully counseled regarding the results of the study and the need for any further evaluation prior to leaving the appointment. All echocardiogram reports and recommendations will be forwarded to the referring providers.

Please fax referral, most recent ultrasound report and demographics to **312.227.9640**.

After faxing listed documents, if patients don't hear from us within 48 business hours, please call **312.227.2740**.

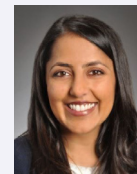

#### PHYSICIANS PROVIDING FETAL CARDIOLOGY CONSULTS AND SERVICES

**Bethan A. Lemley, MD**

*Attending Physician,  
Cardiology  
Assistant Professor of
